

## Tool 24 List of regional and national organisations dealing with HTA in the world

### What is this tool for?

It is advisable for HB-HTA units to have a line of mutual collaboration with national or regional HTA organisations that facilitates respectful cooperation.

This tool provides a list of national and regional HTA organisations in the world.

*Disclaimer:* the list was created mainly based on the INAHTA website and so may not include all relevant organisations.

### Who is this tool for?

The tool was designed for the use of HB-HTA units wanting to establish formal or informal collaboration with national or regional HTA organisations, i.e. to support these organisations in the implementation of the HTA process at national level or incorporate already produced HB-HTA reports into the national database. The collaboration can also provide advice in the field of HTA.

How to cite the Toolkit: AdHopHTA partners. The AdHopHTA toolkit: a toolkit for hospital-based Health Technology Assessment (HB-HTA); Public deliverable, The AdHopHTA Project (FP7/2007-13 grant agreement nr 305018); 2015. Available from: <http://www.adhophta.eu/toolkit>
